EXPERIENCES

○ Oct. 2022 - Mar. 2023

AVIV Group - Meilleurs Agents

Frontend developer

I was working on the "MyPro" product, a SaaS solution for real estate agencies in a team with 1 engineering manager, 1 PM, 3 front developers, 3 back developers and 1 UX/UI.

- Migration from JS to TypeScript (React/Redux)
- Addition of E2E tests and UT tests (Cypress/react-testing-library)
- Mentoring junior profiles
- Deployment to production and monitoring

○ Sept. 2021- Sept 2022

Aéroports de Paris

Frontend developer

Under the supervision of the Projet Manager, I was in charge of developing new pages (from Zeplin) for the new Aéroport de Paris websites (marketplace and customer account platform).

- Integrating pages from Zeplin (React/TypeScript/TailwindCSS/NextJS)
- Developing authentication features (JWT, cookies)
- Developing reusable components for both websites
- Using API provided
- Developing endpoints with NextJS
- Developing a contact page with Sendgrid api
- Setting up best practices (SEO, accessibility, unit tests with Jest/react-testinglibrary, integration tests, LightHouse)

○ Oct. 2019 - Jul. 2021

ManoMano

Frontend developer

ManoMano is a DIY and gardening marketplace. Team of 5 developers (2 fronts, 2 backs, 1 lead) and a Project Manager

- Technical migration from a Symfony monolith with reactJS micro frontends to a ReactJS/TypeScript/NextJS SPA
- Developing new features
- Creation of a design system (TypeScript, SCSS, StoryBook)
- Graphical rework
- Setting up best practices (SEO, accessibility, unit tests (Jest/Enzyme/React-testing-library), integration tests, LightHouse, DataDog)
- Deploying to production

○ Feb. 2019 - Sept. 2019

MyUnisoft

Frontend developer

Under the supervision of the Project Manager and the Lead Developer, I was in charge of developing new pages (from Zeplin) and features an accounting platform

- Integrating pages from Zeplin (ReactJS)
- Setting up the store manager (redux/redux-thunk)

○ Jan. 2017- Jan. 2019

NetDevices

Fullstack developer

NetDevices is a web agency working on several clients

- Developing a hybrid radio mobile application (TypeScript/Angular2/Cordova) + deployment to the stores
- Development of a Soccer League streaming web portal using Angular1, SailsJS, VideoJS, Docker
- Development of a recruiting mobile application using TypeScript, Ionic2, Angular2 + deployment to the stores

○ Jan. 2016- Jan. 2017

Madmoizelle.com

Fullstack developer

Madmoizelle is an online magazine

- Graphical rework
- Adding new features (Wordpress/Jquery)
- Integrating streams in the homepage with Twitch API and Youtube API
